

Omni Fiber

100% Fiber Internet

Is coming to your neighborhood!

Dear Neighbor,

Omni Fiber is excited to announce a multimillion-dollar investment to bring the fastest, most reliable, and most advanced Internet network to your neighborhood.

Our state-of-the-art fiber network will deliver symmetrical speeds up to 10 Gigs (also known as 10 Gbps or 10,000 Mbps)—speeds that traditional cable providers simply can't match. Along with this unmatched Internet experience, we'll offer the most advanced Wi-Fi service to cover your entire home, plus affordable TV, mobile, and home phone options—all supported by our friendly, local customer service team.

To make this possible, Omni Fiber will be constructing a 100% fiber-to-the-home network using existing utility easements to bring these valuable services directly to your home.

We're thrilled to begin this journey in your community and appreciate your patience as we work to deliver the future of connectivity right to your doorstep.

Sincerely,

Darrick Zucco

Darrick Zucco
CEO, Omni Fiber

Our Construction Process

STEP 1

Colored flags and temporary bio-degradable paint markings may be put in your yard to locate underground utilities. Flags and paint markings are placed by an authorized third party in compliance with local guidelines. For safety, please do not remove these flags until after property restoration is completed.

PLEASE NOTE: If you have a sprinkler system, invisible fence, sump pump line, or other underground items near utility lines crossing through your property, please mark them with white or pink flags or landscape-safe paint **AND** report them by submitting the *Construction Feedback Form* available at www.omnifiber.com/construction.

STEP 2

Our professionally trained and certified contractors will attach fiber-optic cables to existing utility poles or place them underground. Our contractors may also be accessing public utility easements on or near your property, marking utilities and, in some cases, digging in some neighborhoods.

STEP 3

Our teams will be working quickly and safely to minimize any inconvenience to you. Once construction is complete, we make every effort to return construction areas back to their original condition. *Visit omnifiber.com/construction for more information about the construction process. If you have additional questions or concerns not covered in our FAQs, please call us at 844.930.1081.*

STEP 4

Enjoy 100% fiber Internet service! Visit omnifiber.com to learn more about our services and place a no-obligation pre-order before **3/30/2026** and get **FREE professional installation** (\$199 value) and **1 Unlimited Mobile Line FREE for 1 year** (\$360 value) when service becomes available at your address. Once construction is complete in the utility easement and service is available to your home, we will contact you to schedule an installation appointment to run the fiber optic cable into your home.

Pre-order before 3/30/2026 and get FREE installation and 1 FREE Unlimited Mobile Line for 1 year when service becomes available.
